

EXPLANTORY NOTES TO ANNUAL SHIPMENT/CAPACITY SAMPLE REPORT

1. All shipment information is for the calendar year shown. The Gypsum Association terminated collecting shipment data for Canada in 2009.
2. The capacity calculation reflects a “snapshot” of the industry taken on January 1 of each calendar year. It does not include capacity modifications that occur or are implemented after the January 1 capacity calculation. All capacity data reflects an annualized calculation.
3. All shipment and capacity data is presented in billion square feet.
4. Capacity calculations for 2001 and subsequent years reflect two separate capacity calculation methods. Each method is presented as a separate figure:
 - The first number is the annual industry capacity defined as the cumulative average yield of ½ inch gypsum board.
 - The second number is the annual industry product mix capacity defined as the average square-foot yield of all thicknesses of actual gypsum board and panel products.

GYPSUM ASSOCIATION

(As of 1/1/2014)

Annual Gypsum Board Shipments, Industry Capacity (1/2" Basis), and Product Mix Capacity (2001+)
 United States and Canadian Manufacturers***
 (Shipments and capacity numbers are in billion square feet, rounded to the nearest million)
